

ZENIVA AYURVEDIC HOSPITAL ERP

Comprehensive Clinical Architecture, Daily Body Issue Tracking, Pharmacy Stock, Computerized GST Invoicing, Panchakarma Scheduling & IPD Bed Operations (HOS v2.4)

Software Edition: Zeniva Hospital OS v2.4	Clinical Framework: Ayurvedic Clinical Operating Standards
Clinical Scope: OPD, IPD, Pharmacy & Rogi Pariksha	Architecture: React 19, FastAPI, SQLite / Supabase Cloud
Lead Engineer: Bhupesh Indurkar	Chief Medical Advisor: Dr. Sohil Indurkar (BAMS, MD)
Deployment Status: Live Production Cloud (Vercel)	Live URL: zeniva-aryurvedic-ai.vercel.app/#overview/hospital_erp

1. Executive Vision & System Architecture

Zeniva Ayurvedic Hospital ERP is an enterprise-grade hospital management system engineered specifically for classical Ayurvedic clinics, hospitals, and Panchakarma sanatoriums. Unlike generic allopathic hospital software that reduces healthcare to ICD-10 codes, Zeniva combines ancient Vedic diagnostic science (Charaka Samhita Nidana & Chikitsa Sthana, Ashtavidha Pariksha) with modern hospital workflows, including real-time computerized GST billing, automated inventory deduction, Panchakarma suite allocation, and IPD bed admission control.

Role-Based Access Control (RBAC):

- Super Admin:** Master operational control. Can add/modify pharmacy catalog, adjust real-time stock levels, inspect system audit logs, configure clinic-wide tax parameters, and manage doctors.
- Ayurvedic Doctor:** Clinical practice authority. Issues computerized GST invoices, logs daily body complaints and Rogi Pariksha findings, schedules Panchakarma therapy courses, and admits/discharges in-patients.
- Public / Patient Showcase:** 100% Read-Only preview. Allows prospective patients and visitors to browse authentic classical formulations, check transparent pricing, review Panchakarma therapies, and verify clinic credentials safely.

Key Operational Benchmark: Zeniva ERP guarantees zero latency through a hybrid offline-first persistence engine. Clinical records, inventory tallies, and invoices are cached in browser localStorage and asynchronously synchronized to Supabase Cloud and FastAPI endpoints.

2. Module 1: Aushadhi Bhandar (Ayurvedic Pharmacy Stock)

The Aushadhi Bhandar module manages the hospital's authentic classical botanical and mineral inventory. It enforces statutory batch control, shelf-life monitoring, and automatic threshold alerts.

Formulation & Sanskrit Name	Ayurvedic Form	Category	Stock Qty	MRP (₹)	Status
Ashwagandha Churna (■■■■■■■■■)	Churna (Powder)	Rasayana & Strength	65 Packs	■220	Available
Triphala Guggulu (■■■■■■■■■ ■■■■■■■■■)	Vati (Tablet)	Digestive & Detox	90 Tabs	■195	Available

Mahanarayana Taila (■■■■■■■■■■)	Taila (Oil)	Joints & Pain Relief	42 Bottles	■340	Available
Khadirarishta (■■■■■■■■■■)	Asava/Arishta	Skin & Blood Purifier	38 Bottles	■260	Available
Brahmi Vati Gold (■■■■■■■■■■)	Vati (Tablet)	Mind & Sleep Care	8 Tabs	■580	Low Stock Alert

3. Module 2: Daily Body Issues & Ayurvedic Rogi Tracker

Newly introduced to address daily clinical body complaints, the **Daily Body Issues & Rogi Tracker (■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■)** records patient health events across organ systems (Srotamsi) and pairs them with classical Nidana assessments.

- **Organ Systems (■■■■■■■■■■):** Categorizes complaints into Spine & Joints (■■■■■-■■■■■), Digestive & Gut (■■■■■-■■■■■), Mind, Stress & Sleep (■■■■■), Respiratory (■■■■■■■■), Skin & Complexion (■■■■■), and Metabolic Vitality (■ ■ ■■■■).
- **Ashtavidha Pariksha Markers:** Tracks Doshic vitiation (Vata, Pitta, Kapha), Agni status (Samagni, Mandagni, Tikshnagni, Vishamagni), Nadi pulse rate/gati, Jihva coating (Saam/Niraam), and sleep/bowel regularity.
- **Integrative Prescriptions:** Records administered formulations, Panchakarma therapies (Janu Basti, Shirodhara), Pathya (wholesome diet) and Apathya (contraindicated food).
- **Clinical Case Slip & CSV Export:** Generates professional printable medical case sheets with doctor credentials and enables bulk export for hospital analytics.

Patient & Phone	Body System	Chief Complaint & Symptoms	Dosha / Agni	Care Prescribed	Status
Kamlesh Indurkar +91 9011942126	Spine & Joints (■■■■■-■■■■■)	Morning knee stiffness & lumbar back pain during walking	Vata-Kapha Vishamagni	Janu Basti + Yogaraj Guggulu (2 BD)	In-Progress
Sunita Deshmukh +91 9423112233	Digestive & Gut (■■■■■-■■■■■)	Post-meal sour water reflux, burning chest & bloating	Pitta-Vata Tikshnagni	Avipattikar Churna + Kamadudha Ras	Under Treatment
Aarav Patil +91 9822314567	Mind & Sleep (■■■■■)	High work cortisol, chronic insomnia & forehead headaches	Prana Vata Samagni	Shirodhara with Brahmi Taila + Ashwagandharishta	In-Progress
Meera Kulkarni +91 9890123456	Respiratory (■■■■■■■■)	Morning sneezing bouts, post-nasal drip & throat scratchiness	Vata-Kapha Mandagni	Nasya with Anu Taila + Sitopaladi Churna	Relieved

4. Module 3: Computerized GST Invoicing & Billing

Zeniva ERP produces computerized, tax-compliant GST receipts for both Outpatient (OPD) consultations and Inpatient (IPD) admissions. Line items dynamically calculate consultation fees, Panchakarma therapeutic procedures, and dispensed herbal medications with statutory CGST (2.5%) and SGST (2.5%) breakdown.

- **Instant Inventory Sync:** When an invoice is finalized, prescribed medicines (e.g., Ashwagandha Churna, Khadirarishta) are automatically decremented from pharmacy inventory.
- **Printable Computerized Invoices:** Every invoice features patient metadata, statutory GSTIN credentials, payment mode (UPI, Cash, Card), clinic seal, and authorized medical superintendent signature.

5. Module 4 & 5: Panchakarma Scheduler & IPD Wards

Panchakarma Care Management: Schedules specialized bio-cleansing therapies including *Shirodhara (Medicated Oil Flow)*, *Sarvanga Abhyanga & Bashpa Swedana (Herbal Steam Bath)*, *Janu Basti (Knee Joint Therapy)*, and *Nasya Karma*. Tracks session progression (e.g., Day 3 of 7), assigned therapist, and patient clinical feedback.

IPD Cottages & Wards: Manages bed allocations across three tiers:

- **Deluxe Ayurvedic Cottages:** Individual cottages with private Shirodhara suites, personalized Sattvic Agni diet, and dedicated caregiver (■2,800/day).
- **Panchakarma Care Suites:** Equipped with traditional wooden Droni tables and steam cabinets for intensive detox programs (■2,200/day).
- **General Care Wards:** Sanitized communal convalescence wards for recovery and post-therapy observation (■1,200/day).

6. Module 6: Clinic Analytics & Revenue Intelligence

Provides real-time clinical business intelligence. Automatically computes **Total Pharmacy Stock Valuation**, **Gross Billed Revenue**, **Active Panchakarma Therapy Utilization**, and **Bed Occupancy Percentage**. Alerts administrative staff to fast-depleting medicines and seasonal surges in Vata/Pitta/Kapha disorders.

7. Mobile View Responsiveness & Engineering Standards

A primary design priority of Zeniva ERP is flawless execution on smartphones, tablets, and desktop workstations without compromise:

- **Responsive Duality:** On mobile displays (width < 768px), wide clinical tables automatically transform into touch-friendly stacked cards (md:hidden), preventing horizontal clipping and illegible micro-text.
- **Swipeable Navigation:** The sub-navigation tab bar supports frictionless horizontal touch-swipe with hidden scrollbars for native app-like fluid interaction.
- **Clinical Excellence:** Designed in strict alignment with authentic classical Ayurvedic methodologies and ABDM digital health records standards.
